## Important CT-AC Findings Not To Be Missed

## Heart

Pericardial effusion and bilateral pleural effusions calcifications

Pericardial

Myocardial infarcts (fat, calcifications)

Masses

Extensive lymph nodes

Metastatic lesions

Compression fracture

Severe fatty liver (steatosis)

Large hiatus hernia

Large ascites

**Note:** CT-AC = computed tomography attenuation corrected

Severe coronary calcification

Severe aortic valve calcification

**Great vessels** 

Aortic enlargement

Bilateral large effusion

## Lung parenchyma and airways

Consolidation (multi lobar/COVID)

Lung nodule(s) masses

Gallstones

Nephrolithiasis
